I. Policy

HIPAA regulations apply to businesses and individuals in the health care industry such as health plans and health care providers (see Definitions below). These are called “covered entities”, meaning they are covered by HIPAA. UW-Madison is a “hybrid entity” in that it has both health care units that perform HIPAA-covered functions (e.g. provide health care) and those that do not. As a hybrid entity, UW-Madison has designated those health care units that perform covered functions, and those individuals or units that perform support functions on behalf of the health care units, as its “Health Care Component”.

II. Definitions

- A. Covered Entity: A health plan, health care clearinghouse, or health care provider that transmits any health information in electronic form in connection with a transaction covered by HIPAA.
- B. Health Care Component (“HCC”): A component or combination of components of a hybrid entity designated by the hybrid entity as covered by HIPAA.
- C. Hybrid Entity: A single legal entity that meets the definition of a covered entity, but whose business activities include both covered and non-covered functions, and that designates a health care component(s).
- D. UW-Madison Health Care Component (“UW HCC”): Those health care units of UW-Madison that have been designated as part of its health care component.

III. Units of the Designated Health Care Component

- A. School of Medicine and Public Health (SMPH), as outlined below.
 - 1. The following Departments and Centers, in their entirety:
 - a. Anesthesiology
 - b. Dermatology
